DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U. S.

Publication No. 2002/0018078 A1 (Khan et al.), herein referred to as Khan.

Referring to claims 1 and 16, Khan discloses a method for defining a composite web page (page 1, paragraph 2). Khan discloses identifying a web page, analyzing the web page to determine a list of the associated elements, presenting the list to a user, receiving a user selection of one or more associated elements from the list and registering the user selection (page 1, paragraphs 7-9).

Referring to claim 2, Khan discloses storing the user selection in a local registry (page 7, paragraph 99).

Referring to claim 3, Khan discloses transmitting the user selection to a remote server for storage (page 6, paragraph 82, lines 6-8).

Referring to claim 4, Khan discloses creating a specification, the specification including data defining how to fetch at least one web page associated with the selected elements and how to extract the selected elements (page 1, paragraphs 10 and 11).

Referring to claim 5, Khan discloses identifying a plurality of web pages and wherein the list includes elements associated with each of the plurality of web pages (page 5, paragraph 73).

Referring to claim 6, Khan discloses defining segments of the list according to each of the plurality of web pages (page 5, paragraph 73).

Referring to claim 7, Khan discloses presenting each of the segments of the list at separate times (page 6, paragraph 74).

Referring to claim 8, Khan discloses determining an identifier associated with the user and wherein registering includes storing the identifier (page 7, paragraph 97).

Referring to claim 9, Khan discloses a method for presenting a composite web page (page 1, paragraph 2). Khan discloses receiving a user request to present a composite web page, identifying at least one element of the composite web page, retrieving the at least one element and rendering the at least one element to form the composite web page (page 1, paragraphs 7-9).

Referring to claim 10, Khan discloses accessing a registry (page 7, paragraph 99).

Referring to claim 11, Khan discloses determining an identifier associated with the user and accessing the registry based on the identifier (page 7, paragraph 97).

Referring to claim 12, Khan discloses retrieving a web page associated with an element and extracting the element from the associated web page (page 7, paragraph 90).

Referring to claim 13, Khan discloses accessing a registry, the registry including data defining the position of each element and wherein rendering includes displaying each element according to the data (page 7, paragraphs 92-94).

Referring to claim 14, Khan discloses a system for defining a composite web page (page 1, paragraph 2). Khan discloses a processor, a memory coupled to the processor storing

Art Unit: 2173

processor executable instructions to control the operation of the processor (page 2, paragraphs 20 and 21). Khan discloses identifying a web page, the web page referencing at least one associated element, analyzing the web page to determine a list of the associated elements, presenting the list to a user and receiving a user selection of one or more associated elements from the list, the selected elements for display on a composite web page and registering the user selection (page 1, paragraphs 7-9).

Referring to claims 15 and 17, Khan discloses a system for presenting a composite web page (page 1, paragraph 2). Khan discloses a processor, a memory coupled to the processor storing processor executable instructions to control the operation of the processor (page 2, paragraphs 20 and 21). Khan discloses receiving a user request to present a composite web page, identifying at least one element of the composite web page, retrieving the at least one element and rendering the at least one element to form the composite web page (page 1, paragraphs 7-9).

Conclusion

2. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. § 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach the method for defining web pages.

Responses to this action should be mailed to: Commissioner of Patents and Trademarks, Washington D.C. 20231. If applicant desires to fax a response, central FAX number (703) 872-9306 may be used. NOTE: A Request for Continuation (Rule 60 or 62) cannot be faxed.
